ACMQD 04 - ACIIIEED! VOLUME 4. WORLD.

The Aciiieed! concept was founded by DJ ESP of Communiqué and Alex P. Jaeger of Acid Tracks records Germany in 2005. It was to be a glorious 100 artist compilation on limited edition colored vinyl released in a round yellow metal film can with an embossed "Smiley" stamped into the lip. Well, despite hard work from all the interested artists and the two acid warriors the vinyl market crashed and we could not get distribution for the project. A few of the editions were released and are now collectable.

The next plan is to release all the tracks digitally with special tracks that did not make the vinyl. Still a great release - we give you the fourth edition of 13 editions. With love.
