ACMQD 15 - Syllable EP by K.Larm & J. Raninen. FIN.

15 - It was year 2001 when K.Larm & J.Raninen project started in Finnish town called Jyväskylä located in the heart of middle-Finland.

Project was born some year or so after K.Larm and J.Raninen had met almost by accident while K.Larm was releasing his new music.

Pretty soon after meeting, both started to spend a lot of time in J.Raninen's & T.Kesäniemi's studios. In early stages T.Kesäniemi (from Healium -project) was jamming along and helping the guys while in studio session.

All early stage studio sessions were based on improvisation and the purpose was just to spend some quality time with friends and the beloved TB-303's.

Idea of starting this collaboration was built up pretty soon after these improvisation based studio sessions. At first the project was more like just spending time and composing music as two guys who both had a bit different style to compose electronic, acid and techno music.

Nice!

Tracklist:

1. dark alley
2. e
3. iron fly
4. luft post
5. plastic pudding
6. syllable
7. undervolt
8. yoke
